About Banking Circle:

Banking Circle is a next-generation correspondent banking provider, uniquely bridging fragmented markets to empower payment service providers, FinTechs, and regional banks with stable, secure and compliant payments. It has operations across Europe with branches in Denmark, Germany, Norway, Sweden, and the UK, alongside subsidiaries in Australia, Liechtenstein, Singapore, and a U.S. "sister" banking entity.

The acquisition of Australian Settlement Limited (ASL) marks a pivotal milestone in Banking Circle's global expansion journey, opening new pathways to serve Australian financial institutions. This union merges ASL's established domestic infrastructure and local market expertise with Banking Circle's modern banking and payments capabilities, creating a powerful, end-to-end payments platform tailored to the needs of Australian and global financial institutions.

Banking Circle is now uniquely positioned to support overseas payments businesses and FinTech's to set up operations and launch in Australia; as well as help take Australian businesses global. It will also allow regional Australian banks to provide frictionless payment experiences to their end customers, without having to build their own clearing and payments infrastructure.
